

	Name	Description	Priority ^(1 - highest, 3 - lowest)	Rationale	
Users					
U01	Creating account	The user shall create an account by providing the following information:		1 Setting up an account allows the user to return without having to re-enter the following information	
U01.1		- Username * Required		1	
U01.2		- First name * Required		1	
U01.3		- Last name * Required		1	
U01.4		- Password * Required		1	
U01.5		8-15 characters long		1	
U01.6		At least one number		1	
U01.7		At least one special character: !@#%&'()		2	
U01.8		At least one uppercase letter		2	
U01.9		At least one lowercase letter		2	
U01.10		- Geographical location * Required		1	
U01.11		- Emergency contacts		2	
U01.12		- 3 additional geographical locations of interest		3	
U01.13		- Language (Spanish or English)		3	
U02	User category	The user shall be categorized as victim, volunteer, or admin.		1 Ensures user gets access to the correct information for their needs	
U03	Private account	The user shall keep their account information private.		2 Users should decide how much information about themselves they want to share online.	
U04	Public account	The user shall keep their account information public.		2 Users should decide how much information about themselves they want to share online.	
U05	User questions	The user shall contact administrators with questions about the system.		2 The user should be able to talk with administrators to better understand the app if needed.	
U06	Reset password	The user shall reset their password through email.		3 The user needs to be able to enter the system again if they forget their password.	
U07	Technical assistance	The user shall contact administrators with technical difficulties.		3 The user needs to receive assistance with technical difficulties in the event of a glitch.	
U08	User contacts	The system shall connect to the user's contacts.		3 Interfacing with a phone's contacts can allow easier communication with loved ones in moments of chaos.	
Admin					
A01	Relief requests	The user shall see relief requests.		1 The admin needs to see relief requests so he/she can moderate them	
A02	Approve request	The user shall approve relief requests.		1 The admin needs to have the authority to approve relief requests	
A03	Decline request	The user shall decline relief requests.		1 The admin needs to have the authority to decline relief requests	
A04	New accounts	The user shall see newly created accounts.		1 The admin needs to see all accounts in order to monitor suspicious activity.	
A05	Priority adjustment	The user shall adjust priorities of relief requests.		1 The admin needs to have the authority to prioritize relief requests to make relief most efficient	
A06	Completed request	The user shall mark relief requests as completed.		1 The admin needs to have the authority mark relief requests as completed so resources move to the next request.	
A07	Switch to victim	The user shall change their user category to victim.		1 The admin needs to be able to use the app if their situation becomes unsafe.	
A08	Decline explanation	The user shall add a message explaining why a request was denied.		2 The user should know why their request was denied	
A09	Re-open request	The user shall re-open a relief request should a volunteer cancel an acceptance.		2 The admin needs to open up a cancelled relief request again so a new volunteer can accept it.	
A10	Inquiry response	The user shall respond to inquiries about relief request status.		2 The admin needs to be able to update users on relief request status	
A11	Answering questions	The user shall respond to inquiries about the system.		2 The admin should be able to communicate with users who need help understanding the system.	
A12	Account suspension	The user shall suspend accounts of disruptive users.		3 Disruptive users or "trolls" should not be allowed to continue to use the app.	
A13	Account reactivation	The user shall reactivate suspended accounts after 7 days.		3 Users who commit minor infractions should be able to regain access to the app's safety tools.	
A14	Account banning	The user shall ban accounts.		3 Especially disruptive users may be permanently banned to protect other users.	
A15	Providing technical assistance	The user shall respond to requests for technical assistance.		3 The admin needs to be able to help users use the system in the event of a glitch.	
A16	Donation notifications	The user shall receive notifications of donations larger than \$5,000.		3 The admin needs to be informed of especially generous donations in order to thank or maintain a relationship with the donor.	
A17	Profanity notification	The user shall receive notifications when profanity is used within the system.		3 The admin can more efficiently ban or temporarily bar users if they are notified of profanity.	
Victims					
V01	Victim category	The user shall specify their status as victim by providing the following information:		1 The user should be able to specify their role as victim so they can get help	
V01.1		- Age * Required		1	
V01.2		- Resource needs		1	
V01.3		- Medical conditions (if applicable)		1	
V02	Category change	The user shall change their status to volunteer.		1 The user should be able to change their role to volunteer so they can help others when they are able	
V03	No help available	The system shall notify the victim if there are no volunteers available within a 100 mile radius.		1 The user needs to know if help is not coming so they can form a new plan.	
V04	Request sending	The user shall send a general relief request.		1 The user should be able to send a general relief request so they can get help	
V05	Relief inquiry	The user shall inquire about the status of a relief request.		2 The user should be able to inquire about the status of a relief request so they can get more information	
V06	Help ETA	The user shall see an estimated time in minutes for how long resources will take to arrive.		2 The user should be able to see the estimated time it will take for help to arrive so they can have hope	
V07	Safe button	The user shall send an "I'm Safe" message to selected contacts.		3 A generic "I'm Safe" message can be quicker and more efficient in moments of distress than writing a text.	
Volunteers					
V01	Volunteer specification	The user shall be able to specify their role as a volunteer by providing the following information:		1 The user should be able to specify their role as volunteer so they can help others	
V01.1		- Beneficial Skills * Required		1	
V01.2		- First Responder? * Required		1	
V01.3		- Transportation Method * Required		1	
V01.4		- Offering shelter		1	
V02	Location Access	The user shall have access to nearby victims' locations.		1 The user should be able to see victims' locations to more efficiently help them	
V03	Status Change	The user shall change their status to victim.		1 The user should be able to change their role to victim when they need help	
V04	Accepting request	The user shall accept relief requests.		1 The volunteer should be able to select relief requests that they want to help with.	

V05	Request completed	The user shall request to mark a relief request as completed.	1	The user should be able to request to mark a relief request as completed so they can help the next victim
V06	Shelter full	The user shall mark their shelter as full.	1	The user needs to be able to communicate when a shelter is at capacity to avoid overcrowding.
V07	Canceling acceptance	The user shall cancel an accepted relief request.	2	The volunteer needs to be able to cancel an acceptance if they become unable to complete it.
V08	Arrival Time	The user shall provide an estimated arrival time for relief.	2	The user should let a victim know the estimated time it will take for help to arrive so they can have hope
Hurricane				
H01	Location	The user shall see the hurricane location.	1	The user should be able to see the nearest hurricane's location so they can prepare
H02	Category	The user shall see the hurricane category.	2	The user should be able to see the nearest hurricane's category to get an idea of how to prepare
H03	Name	The user shall see the hurricane name.	2	Providing a hurricane name makes it clear which weather event is being referenced.
Shelters				
S01	Shelter display	The system shall display the location of the nearest shelter to the user.	1	The user should be able to see the nearest shelter's location so they can evacuate to get help
S02	Shelter information	The user shall access the following information about shelters:	1	The user should be able to see information about shelters so they can know the best one for them
S02.1		- Location * Required	1	
S02.2		- Shelter Type * Required	1	
S02.3		House	1	
S02.4		School	1	
S02.5		Business	1	
S02.6		Community center	1	
S02.7		Other	1	
S02.8		- is Full * Required	1	
S02.9		- Available Medical Equipment * Required	1	
S02.10		- Food Available * Required	1	
S02.11		- Water Available * Required	1	
S02.12		- Car Ready * Required	1	
S02.13		- Pet Friendly	3	
S02.14		- Visual description	3	
S03	Traveling to shelter	The user shall notify a shelter that they are traveling there.	3	The user should notify a shelter they are traveling there so the shelter workers can prepare.
Resources				
R01	Outage updates	The system shall contain power outage updates.	2	The user should be able to see power outage information to know what areas lost power
R02	Restoration updates	The system shall contain restoration updates.	2	The user should be able to see power outage information to know what areas have had power restored
R03	Phone numbers	The user shall view the following phone numbers:	2	Users can see the phone numbers of disaster relief groups to try and get more help
R03.1		- Red Cross	2	
R03.2		- Salvation Army	2	
R03.3		- United Way	2	
R04	Flashlight	The system shall offer a flashlight tool.	3	The user should be able to have access to light if their phone's flashlight is not accessible
R05	Strobe Light	The system shall offer a strobe light tool.	3	The user should be able to have access to a strobe light feature to help draw attention to them when volunteers arrive
R06	Spanish option	The system shall offer a Spanish language version.	3	Users whose primary language is Spanish should be able to use the app.
R07	FAQ	The user shall read a Frequently Asked Questions page.	3	Answers to common questions should be available to decrease burden on administrators.
Relief Requests				
RR01	Submit request	The user shall be able to submit relief requests with the following information:	1	The user should be able to submit relief requests so they can get help
RR01.1		- User information * Required	1	
RR01.2		- Other members of party	1	
RR01.3		- Injury (if applicable)	1	
RR01.4		- Resource need	1	
RR01.5		- Elderly (70+) - higher priority	1	
RR01.6		- Young Child (0-13) - higher priority	1	
RR01.7		- Indoors - lower priority	1	
RR01.8		- Outdoors - higher priority	1	
RR01.9		- Medical conditions - higher priority	1	
RR02	Relief arrival	The user shall see an estimated time in minutes for when relief will arrive.	1	The user should be able to see the estimated time it will take for help to arrive so they can plan accordingly.
RR03	Location Sharing - Volunteers	The system shall share user geographical location with volunteers for all relief requests.	1	The user's geographical location must be known in order for them to receive relief.
RR04	Location Sharing - Admin	The system shall share user geographical location with admin for all relief requests.	1	The user's geographical location must be known in order for them to receive relief.
RR05	Staying	The user shall specify if they are staying home.	2	This ensures that volunteers are aware that these community members might be in need of assistance
RR06	Leaving	The user shall specify if they are leaving home.	2	This ensures volunteers know these community members are not in need of assistance
Geographical Location				
G01	Availability	The system shall be available to users in the United States.	1	The system should be available to users in the United States since the software is based in the United States
G02	Geographical information	The user shall enter geographical information including:	1	The user's geographical information needs to be entered so they can get help in their location
G02.1		- State * Required	1	
G02.2		- City * Required	1	
G02.3		- Zip code	1	
G02.4		- Address	1	
G03	Hurricane incoming	The user shall receive a notification when the hurricane is within 50 miles of their geographical location.	1	The user should be able to see when a hurricane is near so they can prepare
G04	Hurricane leaving	The user shall receive a notification when the hurricane is 100 miles outside their location.	2	This notification can help the user know when the situation is safer.

G05	Additional locations	The user shall specify up to 3 additional geographical locations to receive notifications on.	3	This allows the user to receive updates about areas that friends or family may be residing in.	
G06	Closed roads	The user shall view nearby closed roads.	3	The user should be able to see closed roads so they can plan evacuation	
G07	Safe roads	The system shall recommend nearby roads that are safe to travel on.	3	The user will be able to plan safe escape routes ahead of time with this information.	
Preparation Guidelines					
P01	Preparation guidelines	The user shall view hurricane preparation guidelines including:	1	The user should see hurricane preparation guidelines so they can prepare most efficaciously	
P01.1		- Hurricane safety tips guide * Required	1		
P01.2		- Flooding safety tips guide	2		
P01.3		- Basic first aid guide	2		
P02	Emergency checklists	The system shall provide personalized emergency checklists.	3	The user should see personalized emergency checklists so they can prepare most efficaciously	
P03	Checklist creation	The user shall select which items should appear on their personalized emergency checklist:	3	The user selects what goes on their checklist to make it personalized.	
P03.1		- Pets moved inside	3		
P03.2		- Pet food available	3		
P03.3		- Pet carrier available	3		
P03.4		- Closing windows	3		
P03.5		- Doors locked	3		
P03.6		- Flashlights available	3		
P03.7		- Water available	3		
P03.8		- Canned goods available	3		
P03.9		- Diapers/formula available	3		
P03.10		- Toilet paper available	3		
P03.11		- First aid kit available	3		
P03.12		- Medical equipment available	3		
P03.13		- Medications available	3		
P03.14		- Evacuation plan	3		
P03.15		- Devices charged	3		
P03.16		- Important documents located	3		
P04	Insurance guidelines	The system shall provide insurance guidelines.	3	This resource will help educate users on what kinds of insurance they should have and how to use it.	
P05	Aftermath guidelines	The system shall provide post-hurricane guidelines:	3	This resource will help users adjust to life after the hurricane.	
P05.1		- Home clean-up guide	3		
P05.2		- Post-hurricane safety tips	3		
P05.3		- Mental health tips	3		
P05.4		- Mental health resources	3		
Donations					
D01	Make a donation	The system shall allow users to make donations.	2	The user should be able to make donations to help people suffering from hurricanes	
D02	Card donation	The user shall make donations with credit card.	2	The system should accept credit card donations to make donating accessible	
D03	Check donation	The user shall make donations by check.	2	The system should accept check donations to make donating accessible	
D04	Donation information - system	The user shall read information about the system before donating.	2	The user should be able to read information about the system before donating so they can make a fair judgement	
D05	Donation information - goals	The user shall read information about the goals before donating	2	The user should be able to read information about the system before donating so they can make a fair judgement	
D06	Recurring donation	The user shall make an automatic monthly donation.	3	Some users may want to donate on a regular basis.	
D07	Donator updates	The user shall submit the following contact information when donating:	3	A donator can feel fulfilled and may be more likely to donate again if they stay informed on the app's progress and accomplishments.	
D07.1		- Email address	3		
D07.2		- Phone number	3
